Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/19/07 has been entered.

Allowable Subject Matter

Claims 2-6, 8-14,²¹ 46-50 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest a method for the creation of a suspended inductor, comprising the steps of providing a substrate, depositing a layer of dielectric over the surface of said substrate; depositing a layer of etch stop material over the surface of etch stop material, thereby creating a pattern of said inductor through the layer of etch stop material; etching said layer of dielectric to a measurable depth in accordance with said pattern created through said layer of etch stop material, creating a pattern for said inductor in said layer of dielectric; filling said pattern created in said layer of dielectric with an inductor material to a measurable height; exposing the surface area of said layer of dielectric; and

etching the exposed surface area of said layer of dielectric, thereby creating an air gap in said layer of dielectric, said air gap being contiguous with said inductor material, as in the context of claim 2.

The closest prior art, Bueyuektas et al, discloses to form an inductor over a recess formed in a dielectric layer. However, Bueyuektas fails to disclose the specifics of how the inductor is formed and broadly mentions a background structure 64. There is thus no motivation to use the cited etching and depositing steps, as in the context of claim 2. Hebert also discloses to form an inductor over an air gap, but Hebert also fails to disclose the depositing and etching steps, as in the context of claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
